Database of Registered Variety (Flowering plants) 'Revolution Pinkvein' (Petunia)

Registration No.: 4009

Date of Registration: 94/03/23

Common Name: Petunia

Denomination of Variety: Revolution Pinkvein

Term of Validity: 15 years Name of Owner: Suntory Ltd.

Address of Owner: 1-40, Dojimahama

2-chome, Kita-ku, Osaka

Name of Breeder: Ryuichi Tachibana, Ushio Sakazaki

Summary of Characteristics of the registered Variety

This variety was originated from crossing 'Daddy Mix' introduced from the United Kingdom of Great Britain and Northern Ireland, and an unnamed seedling owned by the applicant, a twining decumbent wild type introduced from Brazil. This variety has small sized flowers having a vivid purplish pink ground color with deep reddish purple vein and the bottom portion of inside throat is dark grayish purple. Its growth habit is twining and decumbent, and the spreading area of the plant is large. The stem length is short, the stem diameter is medium, the anthocyanin pigmentation is not present, pubescence is normal, number of the primary branching is abundant and that of the secondary branching is many and the internode length is short. The leaf shape is elliptic, the leaf-attaching angle to stem is horizontal, the leaf length and width are medium, the petiole is present, and no variegated leaf is present. The single typed, small sized, multi-colored flower opens obliquely upward, the shape of the corolla is normal, and flower has vivid purplish pink (J.H.S. 8904) ground color with deep reddish purple (J.H.S. 9209) net-work-patterned vein, and the bottom color of inside corolla throat is dark gravish purple (J.H.S. 9218) and outside color of the corolla tube is pale reddish purple (J.H.S. 8910). The apex shape of the petal is obtuse, the lobation thereof is shallow, waving grade of the petal is weak, shape of calyx is narrow, stamens and the pistil have the same height, the peduncle length and the diameter thereof is normal. Flowering period at Kobuchizawa-machi, Kitakoma-gun, Yamanashi is early and from late March to early October. The present variety is distinguishable from 'Revolution Brilliant Pinkmini' in that the leaf shape is elliptic, having net-work patterned vein, the ground color of the multi-colored flower is vivid purplish pink with deep reddish purple vein, the bottom color of inside corolla throat is dark grayish purple, and the peduncle length is shorter than that of 'Revolution Brilliant Pinkmini'.

Summary of the breeding history of the registered variety

This variety was selected from seedlings obtained by a crossing of 'Daddy Mix' introduced from the United Kingdom of Great Britain and Northern Ireland, and an unnamed seedling owned by the applicant, a twining decumbent wild type introduced from Brazil, and bred in 1989. Afterward the examination of the characteristics was continued while propagating and the breeding was completed by confirming that the characteristics were stable for three years.

## 登録品種の植物体の特性の概要

### 登録品種の育成の経過の概要

この品種は、平成元年にグレートブリテン及び北部アイルランド連合王国から導入した「DADDYMIX」に出願者所有の無名実生株(ブラジル連邦共和国から導入したつる性ほふ、型の原根)を交配して得られた実生の中から選抜、育成されたものであり、以後、増殖を行いながら特性の調査を継続し、3年その特性が安定していることを確認して育成を売了したものである。
